

HOSTED PAYMENT SERVICES

CCNJ has a variety of customizable payment solutions that allow you to register your clients and process one-time or recurring payments. None of these options require programming on your part -- we host the sites for you on our secure gateway servers.

Membership / Subscription Password Service

CCNJ Membership system automates the entire process of selling login/password accounts for members-only web sites. Want to add restricted access to your site, but worried about the work involved in adding members to the database, billing active members, deleting cancelled members, etc.? Let CCNJ do it for you!

Membership features

- Flexible membership profiles - Merchants can configure different membership subscription profiles and allow the consumer to select the one that fits their need. For example, your customers could select to be billed monthly at one rate, or pick an annual fee at a different rate.
- Real-time payment authorization - Credit card payment information is validated in real-time, giving your customers quick access to your site while assuring that their payment can be processed.
- Automated password management - No programming or manual intervention is necessary. Once a customer successfully signs up, their userid/password is automatically added to the database and they're ready to access your site. Password reminder and cancellation forms are available via online forms, saving you time and money.
- Detailed reporting - Detailed history of each customer accessing your site is available online via that Online Merchant Center web site. Easy to use menus let you manage your subscriber database - You can view a customer's billing history, reset their password, cancel their subscription, and more.
